

He lives in  
people

child  
woman  
man  
homo sapiens sapiens  
big big  
small small  
light dark..race blue

He can be a  
nasty genius

retinopathy  
neuropathy  
microangiopathy  
macroangiopathy  
consequential damages  
I cannot walk  
cannot see cannot see

Why does he  
live with me

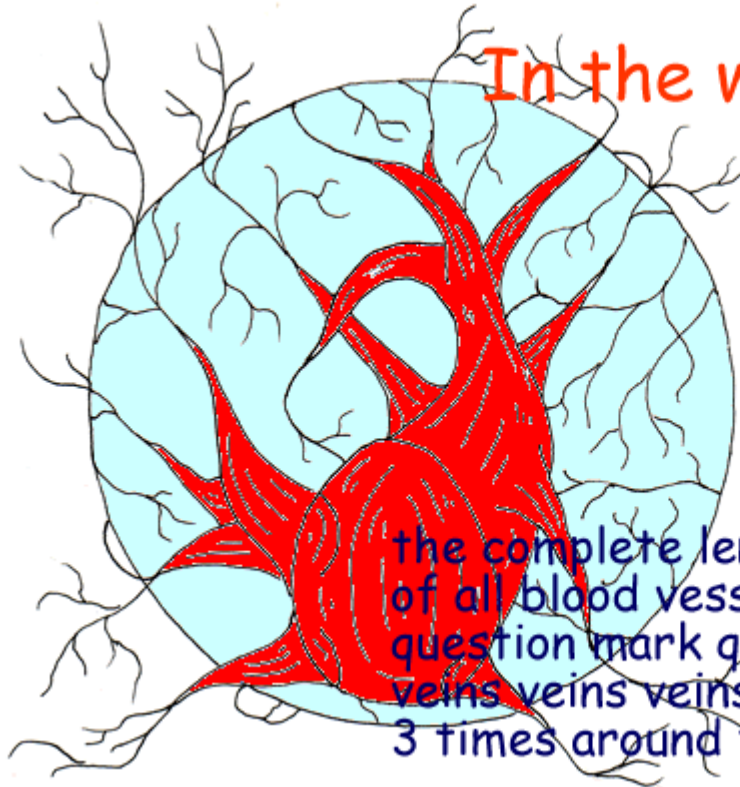

The genes  
hunger hunger thirst  
too much too much  
stress and frustration  
sitting sitting sitting  
zero movement  
few sweating

He swims  
in the blood

261 mg/dL  
sometimes less often more  
huge  
danger danger danger  
detect him  
skin rash cloudy eyes  
thirst thirst lots of urine

## In the whole body

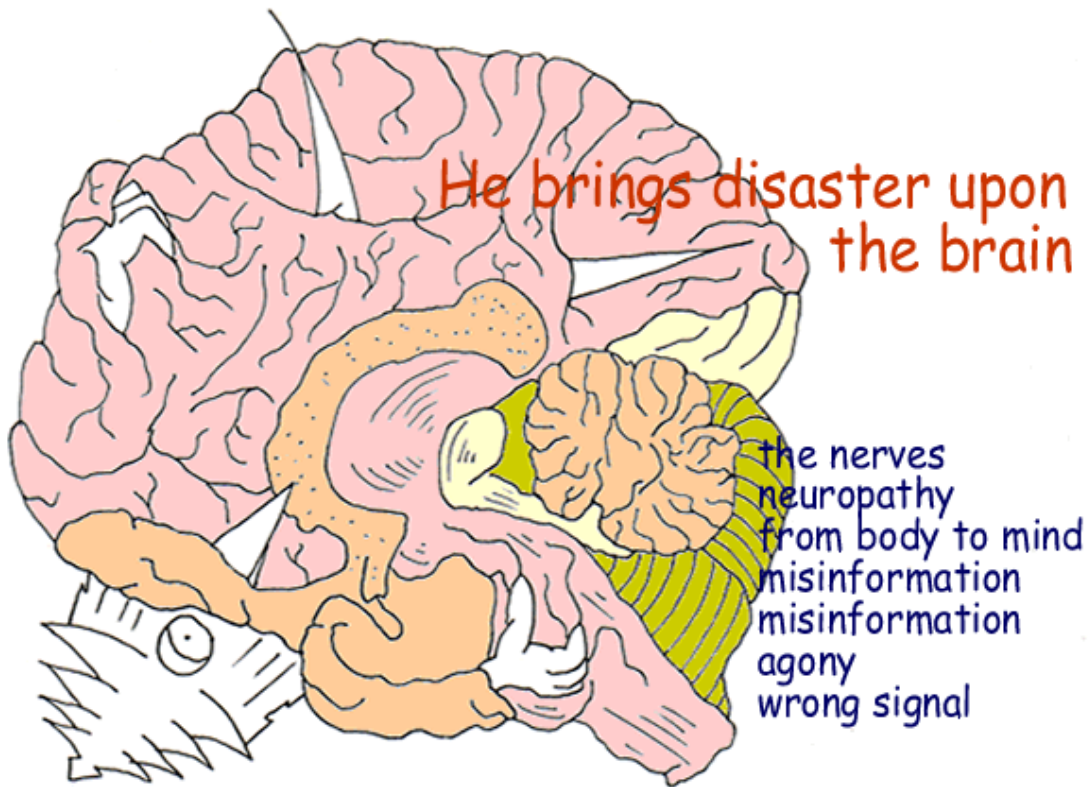

the complete length  
of all blood vessels  
question mark question mark  
veins veins veins blood flows  
3 times around the earth it goes

## He chokes up the veins

macroangiopathy  
caution  
arteriosclerosis  
risk  
heart attack stroke  
erection problems  
blood fat/pressure/  
not everywhere

He brings disaster upon  
the brain

the nerves  
neuropathy  
from body to mind  
misinformation  
misinformation  
agony  
wrong signal

He irritates the eyes

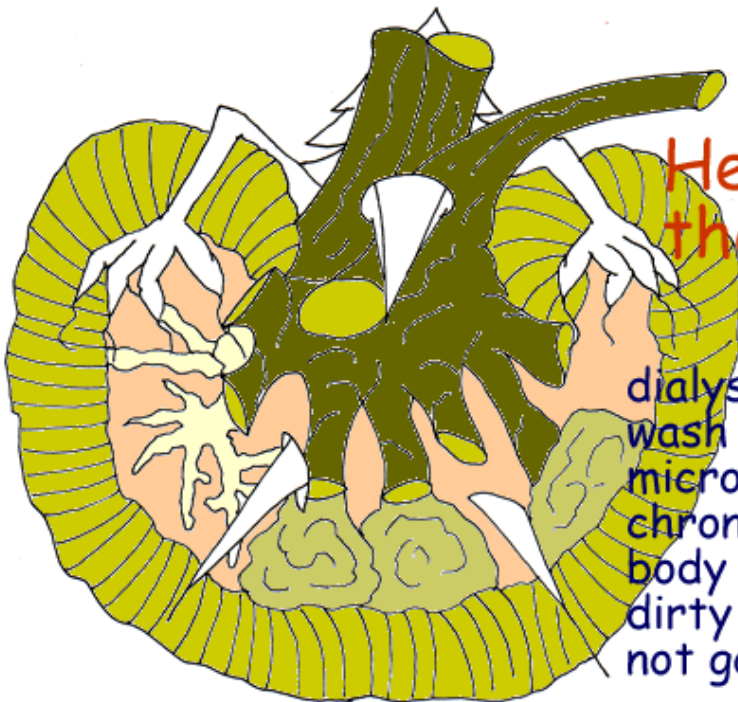

cloudy bleary  
retinopathy  
look not optimal  
fear  
my eyes are  
better worse bad  
blind

## He pinches the heart

blood is pumping  
through kilometres  
a whole life  
with full force  
a solid motor  
starts to stutter  
no lifeblood

## He scratches the kidneys

dialysis  
wash wash blood  
microangiopathy  
chronic breakdown  
body not detoxicated  
dirty blood  
not good not good

## He irritates the skin

rash  
scratch scratch scratch  
apply ointment  
doesn't stop  
scratch scratch scratch  
pustule wart open sore  
genitals affected

## He bites the feet

no blood  
no feeling  
walking standing  
standing walking  
he stops wound healing  
no blood  
no feeling  
walking standing no to both

powerless  
ready for permanent rest  
first aggressive then calm  
metabolic alarm  
bad digestion  
kidney chaos  
urge to urinate  
sugarless cell...ill

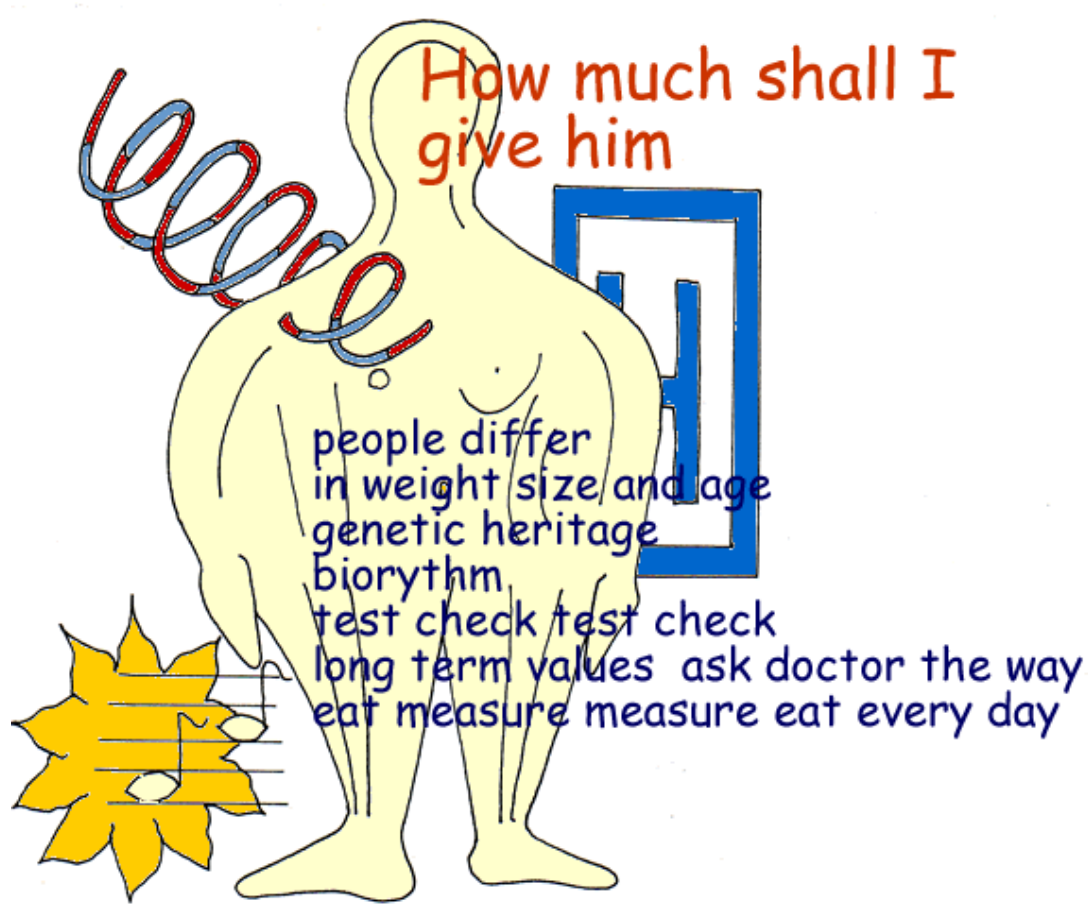

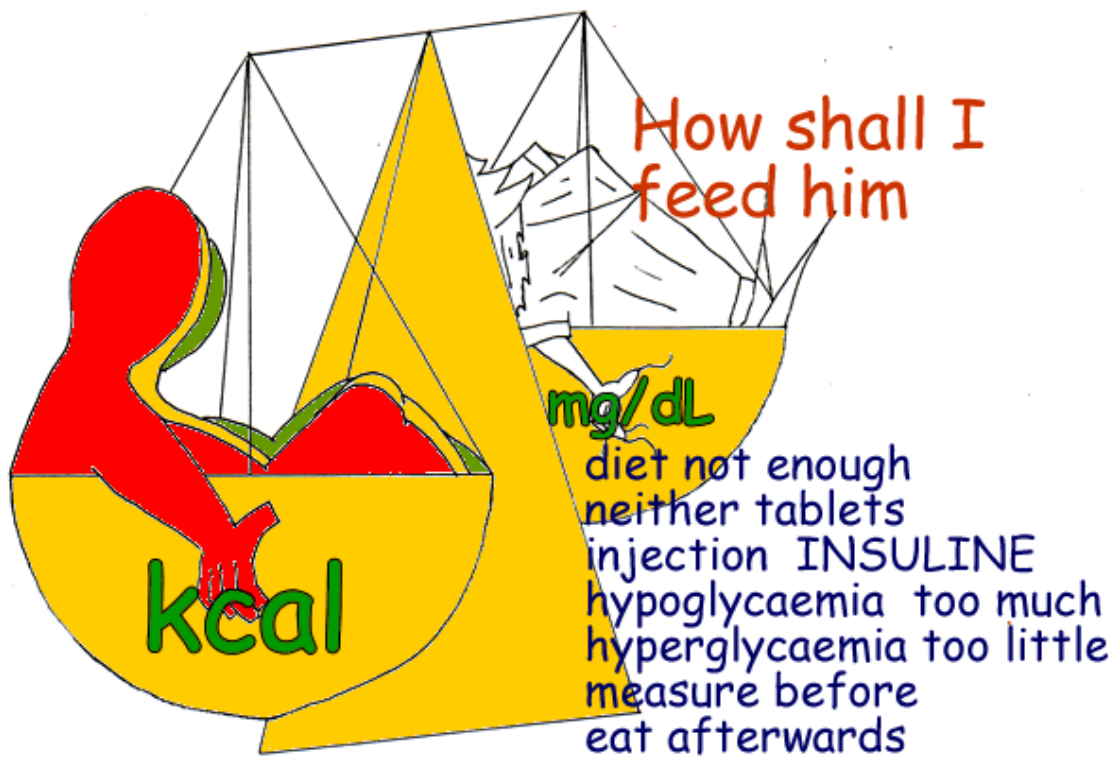

He makes  
you tired

Give him food

the pill  
the syringe  
diet diet diet  
medicine medicine  
food for him  
the goal in me  
mind the quantity

What shall I live on

bread units  
 glucose fructose  
 lactose sucrose  
 carbohydrates  
 thirst drink hunger eat  
 should taste good  
 slowly no stress  
 eat measure measure eat

When

are

we

both

satisfied

eating drinking

living loving

ill yet fit

nutrition nutrition

medicine medicine

combined forever

makes sense together
